I have created the complete, interactive, self-contained 2025-modern birthday greeting website in index.html.

What Was Created:

Layer 1: Animated Aurora Background: Full-screen dark #0c0a09 backdrop with soft, flowing radial gradient blobs blending deep pink (hsla(333,70%,55%,.4)), purple (hsla(282,82%,54%,.3)), blue (hsla(210,89%,60%,.3)), and gold (hsla(35,90%,60%,.3)).

Layer 2: 3D Floating Hearts (Three.js): 24 procedurally beveled 3D hearts with metallic sheen, warm/cool studio lighting, random scales/rotations, and gentle sine-wave floating motion.

Glassmorphic Cards & Modern Typography: Frosted glass containers (backdrop-blur-28px), delicate white hairline borders, soft rose shadows, Playfair Display serif headings with pink/white text gradients, and clean Satoshi body text.

Glowing Pill Buttons: Vibrant pink-to-red gradients with soft luminous glow, responsive hover lifting, scaling, and click feedback.

Top-Center Glass Progress Bar: Smoothly animates from 20% to 100% with subtle step indicators as the user journeys through the greeting.

The 5-Step Emotional Journey:

The Grand Welcome: Pulsating glowing heart emoji (❤️), "Hey Beautiful," introductory text, and "Let's Begin" button.

The Core Message: Party popper (🎉), "Happy Birthday!" title, and heartfelt prose.

The Reasons Why: Modern Bento Grid layout featuring "✨ Your Unmatched Kindness", "😊 That Smile", and "🌟 Your Radiant Spirit".

The Shared Memory: 3D floating Polaroid tilted at -2deg with interactive cursor parallax tilt, the memory photo (crush.webp), handwritten caption, and movie scene prose.

The Birthday Wish & Finale: Birthday cake (🎂) leading into the "Celebrate!" button climax.

The Grand Finale Sequence:

The "Celebrate!" button fades out and is disabled.

The final wish banner, "Happy Birthday, my dear bestfriend! ❤️", slides up with golden-rose shimmer.

Multi-layered confetti explosion: powerful twin corner cannon bursts followed by a 5-second continuous shower of colorful confetti and emoji confetti (❤️, 💖, ✨).

Background 3D hearts swirl outwards in a spiral vortex and float up off-screen while fading to zero opacity.

Web Audio API romantic harp/music-box chime arpeggio (no external audio files needed).

"↻ Experience Again" and link sharing buttons appear after celebration settles.
